

OhMiBod adds New iPod / iPhone Compatible Vibes to their Line of High Tech Personal Pleasure Products

July 15, 2007 Greenland, NH...The tunes keep on coming. Today OhMiBod introduces a new twist on their successful flagship product, the OhMiBod iPod® vibrator. This new G-spot vibrate, like its sister, vibrates to the beat and rhythm of your favorite music. Its hot pink curved tipped body, satin finish and chrome detail is sure to hit all the right spots. "We are very excited to bring this product to market" says OhMiBod, Founder, Suki. "We want to give our customers plenty of options and with G-spot they now have a whole new way to feel their music."

Along with G-spot, OhMiBod is also introducing two new "must have" cell phone accessories, Boditalk and Boditalk *escort*. The Boditalk product line consists of cell phone activated vibrators that produce a patterned vibrating sequences when calls are made to or from your cell phone or iPhone™. The vibrations last for the entire call, enabling you to "get off while you're on". Boditalk comes in two versions; Boditalk - a hot pink cigar shaped vibrate with chrome detail and a velvety feel; Boditalk *escort* – a discreet and wearable bullet vibrate for our customers "on-the-go" who can't leave home without it!

"We've created the Boditalk line with couples in mind. Every couple needs to keep things spicy – Boditalk does that and more!" says OhMiBod Founder, Suki. "It brings the idea of phone sex to a whole new level and it is, of course, fully compatible with Apple's new iPhone™!" Like the OhMiBod product line of iPod vibrators, the Boditalk line is also completely versatile and fully functional as stand alone vibrates with multiple patterns and speeds to choose from.

The introduction of OhMiBod G-spot and the Boditalk products further emphasizes OhMiBod's commitment to designing high tech personal pleasure products to meet the demand for mainstream vibrators and supports its belief that women desire sophisticated, approachable and easy-to-use toys.
